

Senior Well Test / Completions Engineer

Valeura Energy Inc.

Valeura is seeking a **Senior Well Test / Completions Engineer** to work a rotational assignment to Turkey. The successful candidate will work with a Completions Superintendent to plan, complete, frac and test deep exploration wells. Valeura is working at depths of 4800 m and pressures in excess of 84 MPa (12,000 psi).

Our ideal candidate is expected to have following skills:

- Strong understanding of well testing principles, well test metering, sample collection and data collection requirements.
- Strong data management skills with attention to detail.
- HPHT Completion Engineering skills.
- Production Engineering skills.
- Gas hydrate knowledge and gas lift experience a plus.
- Strong leadership and team skills to work with a diverse team.
- University degree in Petroleum Engineering or related field.
- Excellent organization and coordination skills.

Our ideal candidate will have the following experience:

- Familiar with well testing equipment and flowing back sand fracs.
- Experience in well test data collection, quality control and analysis.
- Extensive completion and workover experience in nonconventional reservoirs in Western Canada.
- HPHT completion and testing experience with gas condensate reservoirs.
- Coiled tubing clean-out and drill-out best practice experience.
- Multistage Frac Stimulation experience.
- Budgeting and cost control experience.
- Ability to promote and foster team relationships.
- Ability to train junior engineers.

Interested individuals please send resumes to Careers@valeuraenergy.com.
